  - Built APIs that performed CRUD operations for storing user data

PORTFOLIO

Web Portfolio

Codewars | Data Structures and Algorithms
Solved over 300 coding challenges in **Codewars** with **JavaScript** | **Profile**

ABOUT ME

Hello! My name is Greg and I'm a web developer from the Philippines. Before getting into the tech industry I've worked in the Customer Service Industry for 3 years for several international companies and 2 years in a legal corporate office. With experience I've learned the importance of teamwork, as well as developed my leadership, problem solving, and communication skills

I love programming, and I'm looking for new challenges and bigger roles to fill with my acquired experiences.
